|------------------------------------|---|---------------------------------------|
| ACADEMIC BACKGROUND | University of Southern California Ph.D. in Electrical Engineering | Los Angeles, CA 2017 - 2022 |
| | University of Southern California M.S. in Electrical Engineering | Los Angeles, CA 2017 - 2019 |
| | Nankai University B.S. in Electrical Engineering | Tianjin, China 2013 - 2017 |
| SKILLS | <ul style="list-style-type: none">• 5 years of research experience in integrated circuit (IC) reverse engineering, protection, and vulnerability analysis.• Advanced coding skills in Python, C/C++, and Verilog.• In-depth knowledge of VLSI/SoC design, formal verification, computer-aided design, and applied cryptography.• Practical experience in mathematical computation and analysis tools, e.g., MATLAB and CPLEX, and system simulation tools, e.g., Simics. | |
| PROFESSIONAL EXPERIENCE | Senior Software Engineer I Synopsys Inc. , Sunnyvale, CA | Jan 2023 - present |
| | <ul style="list-style-type: none">• Working on high-performance EDA solutions around DSO.ai [link], a Synopsys AI application for chip design. | |
| | Research Assistant University of Southern California , Los Angeles, CA | Aug. 2017 - Dec. 2022 |
| | <ul style="list-style-type: none">• Conducted research on hardware security solutions for intellectual property (IP) protection against threats coming from the integrated circuit (IC) supply chain, including the design and formal analysis of gate-level and register transfer logic (RTL)-level circuit obfuscation methods to prevent IC reverse engineering.• Published 10+ research papers [link] in top-tier conferences and journals in the field of hardware security and electronic design automation.• Received government research funding from the Air Force Research Laboratory (AFRL) and the Defense Advanced Research Projects Agency (DARPA). | |
| | Security Research Intern Intel Corporation , Hillsboro, OR | May 2022 - Aug. 2022 |
| | <ul style="list-style-type: none">• Collaborated on next-generation security technologies that take full advantage of the latest OS and silicon innovations to solve challenging security problems.• Developed proof-of-concept firmware solutions to guarantee secure storage and processing of users' sensitive data on Intel silicon.• Learned and practiced secure code review to mitigate security vulnerabilities that could lead to compromise in user data privacy. | |
| | Software Engineering Intern Synopsys Inc. , Mountain View, CA | May 2021 - Aug. 2021 |

- Worked on high-performance EDA solutions around DSO.ai [\[link\]](#), a Synopsys AI application for chip design.
- Developed and debugged new features to incorporate previous design information and its optimal solution to the AI model, allowing DSO.ai to further reduce the time to results for new and similar designs.
- Built a user interface to visualize design similarities among a number of customers' designs, which helped the team efficiently analyze the performance of different similarity metrics and choose the optimal one.

MENTORING

Teaching Assistant

Jan. 2020 - May 2020

University of Southern California, Los Angeles, CA

- Course: EE577A (VLSI System Design), Spring 2020.
- Held weekly discussions and guided students on fully customized VLSI system design using Cadence tools.
- Received the highest student evaluation score for the year and Honorable Mention for Charles L. Weber Memorial Outstanding Teaching Assistant at USC ECE department.

Ph.D. Mentor

Summer 2018, 2019, and 2020

University of Southern California, Los Angeles, CA

- Mentored three local high school students to complete a hardware security-related project during SHINE [\[link\]](#), a K-12 outreach program at USC.
- Helped mentees prepare for relevant skill sets for college entrance and develop interests in research in engineering.

AWARDS AND HONORS

- Young Fellow, Design Automation Conference, July 2022 & July 2020.
- Outstanding Teaching Assistant Award (Honorable Mention), USC, Apr. 2021.
- Outstanding Graduates Award, Nankai University, May 2017.
- Samsung Scholarship, Samsung Electronics, Dec. 2015.
- National Scholarship, Chinese Ministry of Education, Dec. 2014.
